Urban areas: 1/5.000

Each Unit of Strategic map presents a table with the population exposed to the indicators, Lden and Lnight in 5 dB ranges.

Example of tables with the number of people (in hundreds) exposed to bands of Lden and Lnight.

The report summary is a document that summarizes:

- •the main characteristics of the study
- •the local and regional legislation in the zone
- •the description of the roads, and an analysis of the conflict areas with the possible solutions.

Process:

- 1. The identification of the most exposed zones
- 2. To establish a diagnosis

Maps are not only paper
